Update: March 3, 2016:

Over the past two weeks Mr. Dodge, Mr. Keith, Building Principals, Custodial Supervisor and Maintenance Director walked through and evaluated the Elementary, Middle School and Riverside Academy. There are no major issues at these buildings and work orders have been put in place to address the minor concerns (paint, replacement of shower heads, tile work, etc).

Update: February 24, 2016:

“Airborne mold levels inside of the building were very low and would not be a cause to restrict activity in those areas sampled.”

SURVEY CONDUCTED BY: Certified Environmental Services, Inc.

DATE OF REPORT: February 24, 2016

Update: February 22, 2016:

We have set up Building Walk throughs with administrators for the Elementary and Middle Schools as well as Riverside Academy.

The Air Quality Test was performed on the High School on Friday. The results will be back in a week to ten days.

The partitions for the high school restrooms have been ordered. They will take about 6 weeks to be delivered.

This morning, Tuesday, February 16, 2016, there was a thorough walk through of the high school building. Those included in the walk through were Board President, Gregg Keith; Superintendent, Michael B. Dodge; High School Principal, Bryan Schroeder; High School Assistant Principal, Chuck Fuller; Maintenance Director, Keith Pilbeam; Custodial Supervisor, Barry Fetters. The group of administrators analyzed all of the issues and a report will be delivered back to the Board as well as placed on the District Facebook page and on the District Website. Restroom doors and partitions have been ordered and the District is in the process of getting bids on the roof, as well as having air quality tests done.
